

A close-up photograph of a man with short brown hair and a light beard, wearing a grey watch, focused on working on a complex industrial machine. The machine features various metal components, gears, and blue cables. The man is using a pair of red-handled pliers to adjust a part of the machine. The background is slightly blurred, showing a workshop environment.

Machine overhaul

Tornos Service

Maintain the value of your production tool, and recover its productivity

After many years in service, the productivity and precision of machine-tools are reduced, particularly due to wear.

The overhaul that we perform in our workshops fully restores the capacities of your machine.

We offer an overhaul service by highly qualified engineers. We are happy to come and inspect your machine and to offer you on-site advice to provide you with a customised quote. We can also re-commission the machine on your premises.

Additional software updates and a selection of set-up alteration options may also improve the performances of your machine.

Advantages for you:

- Precision, reliability and productivity of the original machine
- Extend the service life of your machine
- Use original spare parts
- Overhaul carried out by specialists
- Very high quality results
- Rapid overhaul thanks to our wide ranging stock of spare parts
- Use existing part programs and processes
- No investment in new equipment or tooling
- Complete documentation of work performed and spare parts, with geometry protocol

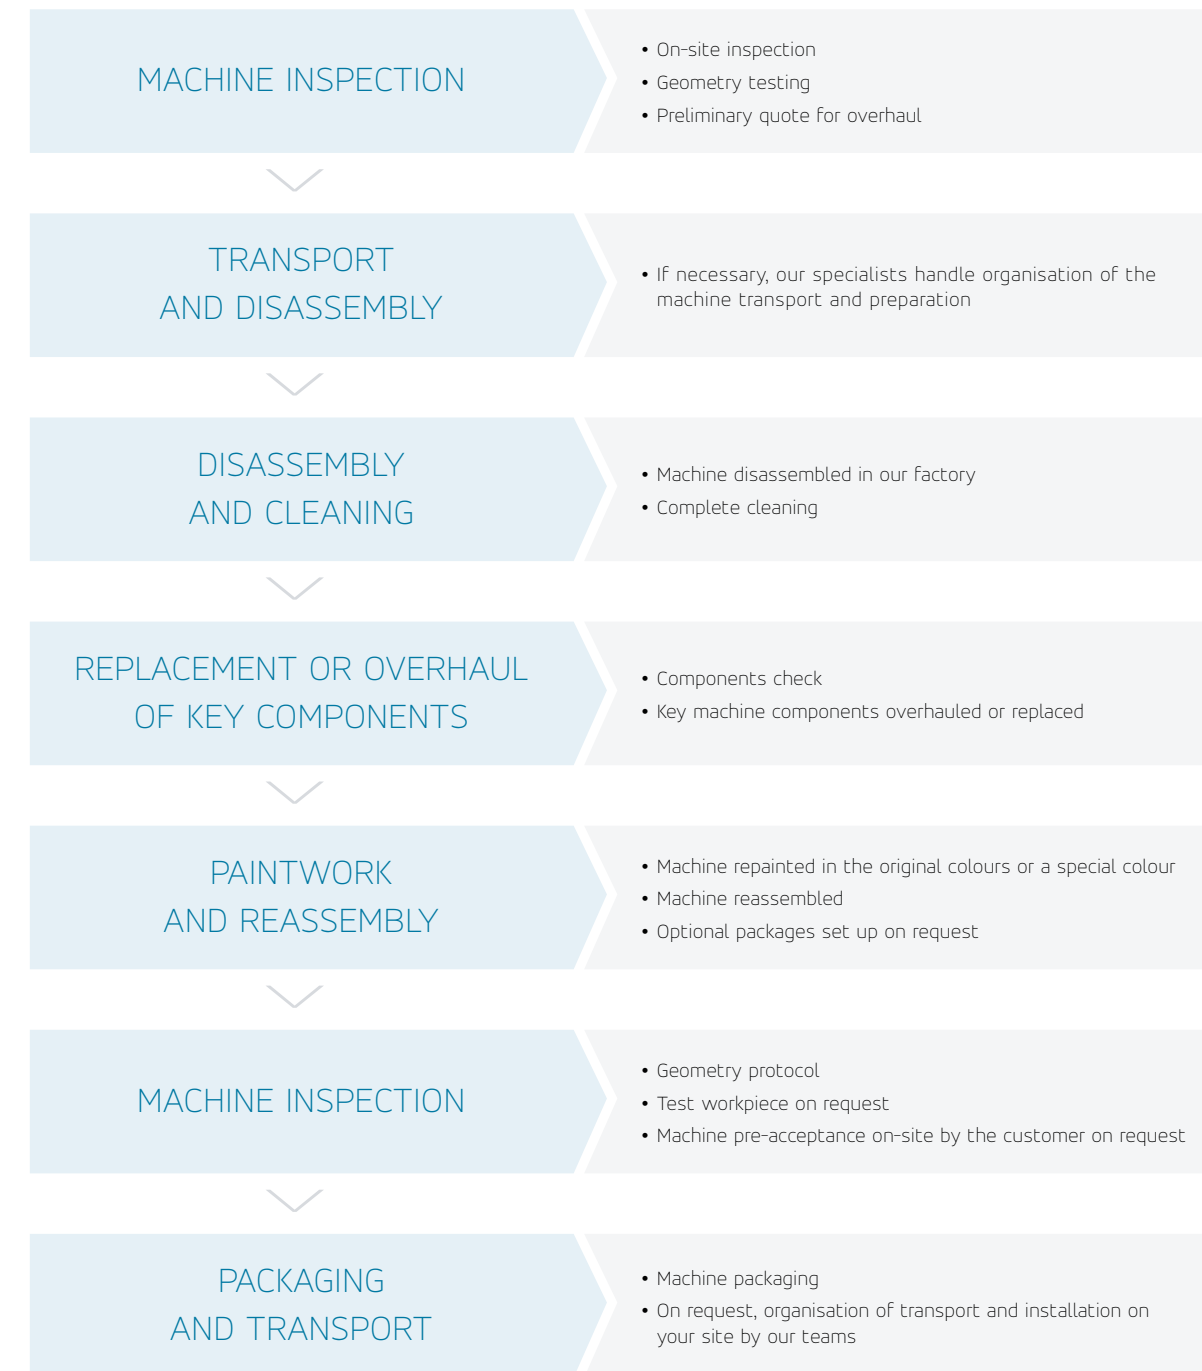

We offer a one-year warranty (parts and labour) for replaced parts.

7 STAGES TO ENSURE THE OVERHAUL OF YOUR OLD MACHINE

As the manufacturer, we can offer you a high-quality overhaul. We have your machine's history and the original documentation.

With Tornos, you get guaranteed use of original spare parts, and premium quality service and technical expertise.

We keep you turning
