

Innovation to meet customer's requirements

Moutier, 23rd September 2005

Every two years the machine tool trade holds its most important trade fair – the EMO – which this year, took place in Hanover. Tornos exhibited, in particular, two new single spindle machines and a new multispindle machine comprising three major innovations together with a new version of the programming software, TB-DECO 2006.

Tornos participated in this event under the slogan of “Innovation is a state of mind” and is one of the exhibitors to display the largest number of innovations. 600 visitors from more than 40 countries showed a strong interest in these products.

The outcome of this event is very positive for Tornos. 125 offers are to be made over the next few days and 26 machines were ordered at the stand, confirming that the innovations proposed adequately meet market requirements.
