

PRESS RELEASE

Special Action to Celebrate Grand Opening

Moutier, 21st June 2007

Tornos opened two European tech-centres in June 2007. These new services will allow the manufacturer to be closer and respond faster to customers with any requirements throughout Europe.

To celebrate this opening, customers can benefit from a special offer for the new Tornos Sigma 20 turning centre.

From now till the end of August, the Swiss manufacturer is offering a Sigma 20 turning centre "basic package" with special conditions and offer a rapid delivery time! Never before has the quality and productivity that is synonymous with Tornos been so easily accessible.

The package is a simplistic way for a customer to buy a "plug and work" solution that includes various devices like toolholders, tooling and the bar loader. This action has been made possible credit to the standardisation of the offer, which enables Tornos to produce customer solutions with more efficiency. That doesn't mean customers cannot tailor their machines to individual requirements.

This offer is valid until the end of August in Europe and the manufacturer has already prepared its manufacturing facility to accommodate increased demand.

If you need further information on this exciting new offer, please visit www.tornos.com/special
